

BIPASHA MEHRA

AI Systems Developer | Full-Stack AI Developer | AI Product Builder

techieinterns@gmail.com | techieinterns.vercel.app | github.com/saishamehrra | India

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with experience building and deploying AI-powered applications across AI security, trust intelligence, privacy automation, cognitive security, and multi-agent ecosystems. Skilled in full-stack development, AI-assisted software engineering, rapid prototyping, system architecture design, API integration, and cloud deployment. Developed and deployed 8+ AI projects spanning security orchestration, privacy intelligence, prompt security, explainable AI, and cognitive intelligence systems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases & Cloud: MongoDB Atlas, Supabase

AI & Security: AI Security, Prompt Security, Multi-Agent Systems, Trust Intelligence, Cognitive Security, Explainable AI, Prompt Engineering, Workflow Automation

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Netlify

FEATURED PROJECTS

CyberMesh | AI Security Orchestration Platform

- Built and deployed an AI-powered security orchestration platform focused on threat reasoning, trust propagation, and workflow automation.
- Architected interconnected security modules, reasoning systems, and orchestration workflows.
- Developed deployment-ready infrastructure and interactive visualization components.

SecRitual AI | Security Reasoning & Trust Intelligence Platform

- Built an AI-driven security reasoning platform focused on contextual risk analysis, explainability, and trust-aware decision support.
- Designed trust-centric workflows for intelligent threat evaluation and security assessment.

OpenMind Nexus | Multi-Agent Cognitive Intelligence Platform

- Developed a multi-agent ecosystem exploring information integrity, cognitive security, trust formation, and reasoning transparency.
- Implemented collaborative AI workflows for intelligence synthesis, evaluation, and analysis.

Consent Guardian AI | Privacy & Consent Intelligence Platform

- Created a platform for analyzing privacy risks, consent boundaries, and trust compliance across software environments.
- Automated privacy-focused evaluation workflows and risk identification processes.

ADDITIONAL PROJECTS

PromptShield Lite (Prompt Security Gateway) • SIFTGuardian (Python-Based Threat Analysis System) • CodeSage (AI Code Intelligence Platform) • NeuroAccess (Cognitive Security Research Platform)

ACHIEVEMENTS

- Built and deployed 8+ AI-powered applications spanning AI security, trust intelligence, privacy automation, and multi-agent ecosystems.

EDUCATION

Bachelor of Technology (Information Technology)

Global Group of Institutes | 2022–2026

CGPA: 8.16 / 10.0
